ASSIGNMENT — 09

Student Admission Enquiry Form

Basic Fields Use Case — Zoho Creator

Application	Student Admission Enquiry Management
Form	Admission_Enquiry_Form
Course	Low-Code Application Development using Zoho Creator
Name	Hoshni Sivaprakash
Roll Number / Semester	241401029 / V Semester
Department	Computer Science and Business Systems

Lab Record / Practical Report

Aim

To design and build a functional Student Admission Enquiry Form application in Zoho Creator using all thirteen Basic Fields available in the Form Builder, and to capture prospective students' personal details, contact information, academic preferences, counselling availability, and consent in a structured manner.

Problem Statement

Admission enquiries received through calls, walk-ins, and emails can lead to inconsistent or incomplete records. A single online form helps the Admission Cell capture, validate, review, and follow up on enquiries efficiently.

Procedure / Steps Involved

Create the application from scratch, assemble the admission form with suitable field types, configure mandatory rules and validation, test the live form, and review submitted records in the report. Replace each screenshot placeholder with a screenshot from your own Zoho Creator application.

Step 1 — Create the Application Workspace

Create a new application named Student Admission Enquiry Management in Zoho Creator. Choose the from-scratch option to configure

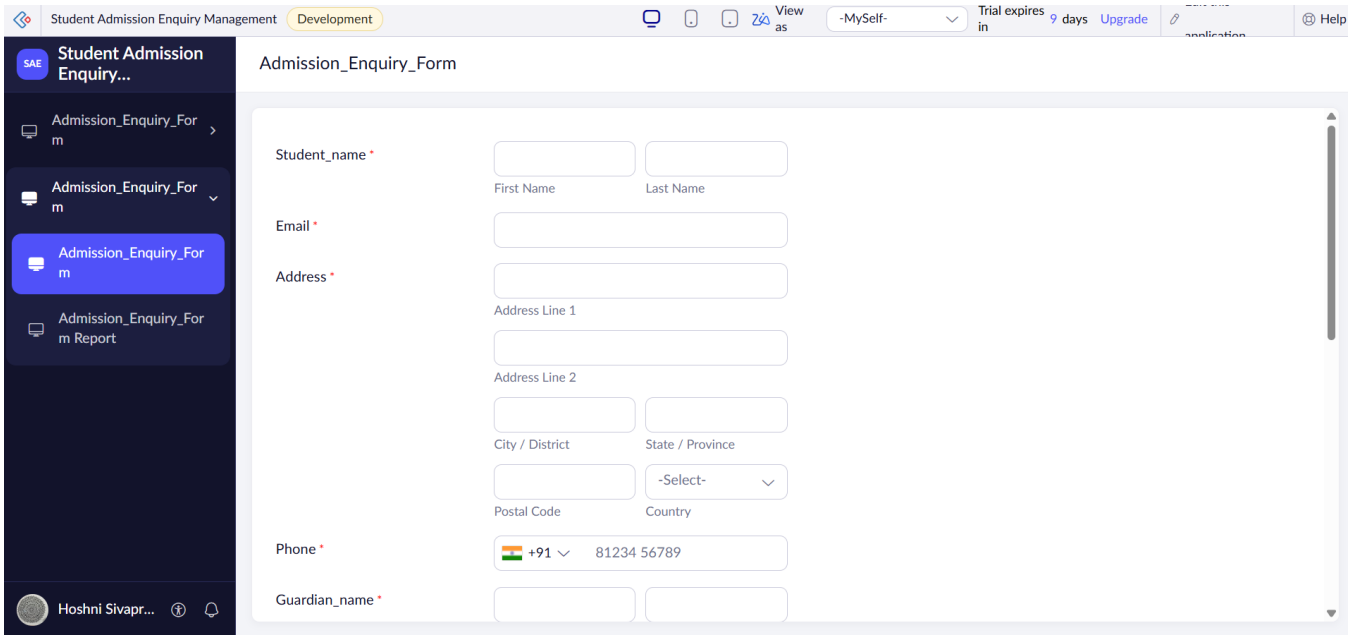

Fig. 1. Application workspace showing the Student Admission Enquiry Management application.

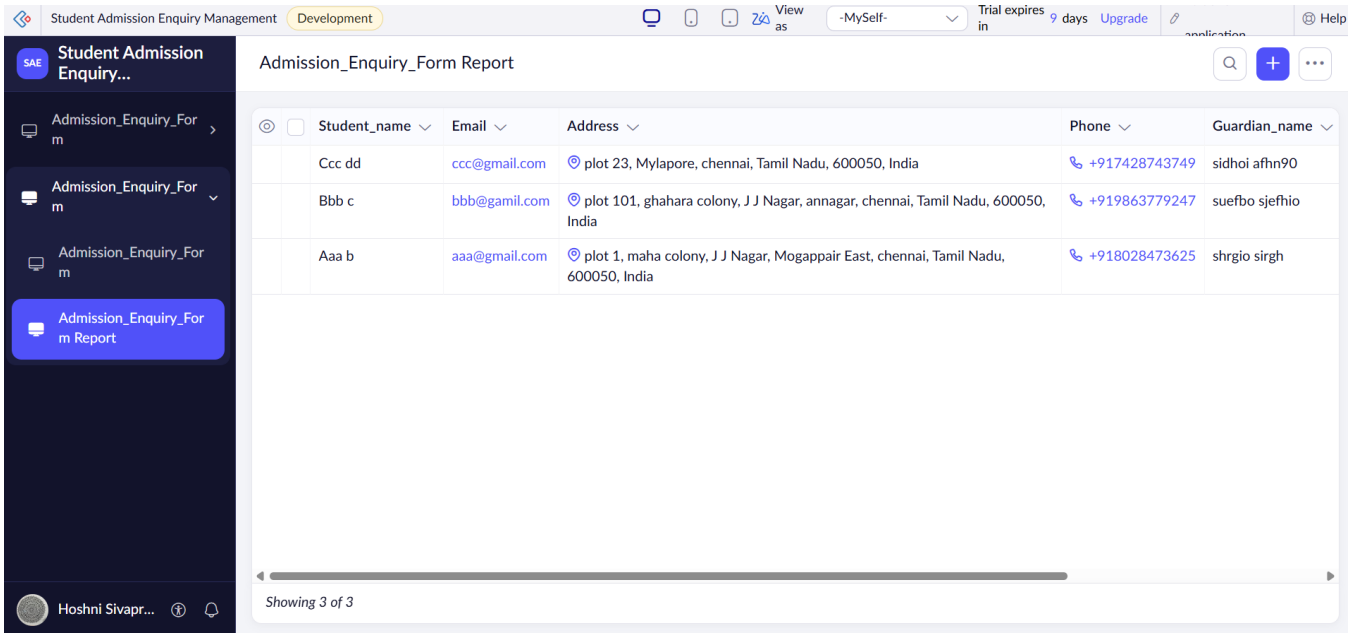

Step 2 — Create the Admission Enquiry Form

Create a form named Admission_Enquiry_Form and organize it into Personal Details, Contact Details, Guardian & Academic Details, and Scheduling & Consent.

Step 2 — Configure the Thirteen Basic Fields

Use each Zoho Creator Basic Field type for the purpose shown below.

Basic Field	Form Field Name	Purpose / Example
Name	Student_Name	Applicant's first and last name
Email	Email_Address	Validated email address
Address	Residential_Address	Full postal address
Phone	Contact_Number	Indian contact number with country code
Single Line	Guardian_Name	Parent / guardian name
Multi Line	Additional_Remarks	Course interest or other remarks
Number	Class_XII_Percentage	Marks percentage, from 0 to 100
Date	Date_Of_Birth	Applicant's date of birth
Time	Preferred_Counselling_Time	Preferred counselling slot
Drop Down	Preferred_Course	Programme selection
Radio	Gender	Male / Female / Other
Multi Select	Areas_Of_Interest	Technical or extracurricular interests
Checkbox	Terms_Agreement	Consent to terms and privacy policy

Step 3 — Configure Sections and Validation

Section A — Personal Details: Student Name, Date of Birth, Gender.

Section B — Contact Details: Email Address, Contact Number, Residential Address.

Section C — Guardian & Academic Details: Guardian Name, Class XII Percentage, Preferred Course, Areas of Interest.

Section D — Scheduling & Consent: Preferred Counselling Time, Additional Remarks, Terms Agreement.

Validation Rules

- Make Name, Email, Phone, Date of Birth, Gender, Preferred Course, and Terms Agreement mandatory.
- Enable built-in email format validation.
- Configure the phone field for Indian numbers with country code.
- Restrict Class XII Percentage to values from 0 to 100.
- Disallow future dates for Date of Birth.
- Prevent submission unless Terms Agreement is checked.

Step 4 — Preview and Publish the Form

Open the live preview or published form and confirm the section order, field labels, options, mandatory indicators, and validation rules.

Step 5 — Test the Form with Sample Data

Complete the live form with sample applicant details. Test mandatory fields, valid and invalid email formats, phone number entry, percentage range, date restriction, dropdown choices, multi-select interests, and consent. Submit at least three sample enquiries.

Step 6 — Verify Records in the Report

Open Admission_Enquiry_Report and confirm that each submission appears as a record with values stored under the correct columns. The Admission Cell can review enquiries and filter them by Preferred Course for follow-up.

Workflow Summary

1. Applicant opens the public form link shared by the Admission Cell.
2. Applicant enters personal, contact, academic, and scheduling details.
3. Zoho Creator validates mandatory fields and formats on submission.
4. A new record is added to Admission_Enquiry_Report.
5. An automated confirmation email can be configured using the Email field.
6. The Admission Cell reviews enquiries, filters by course, and arranges counselling.

Expected Learning Outcomes

- Understand the purpose of each of the thirteen Basic Fields in Zoho Creator.
- Structure an online form into logical sections.
- Configure mandatory, format, range, and date validations.
- Understand how form submissions populate report views and can support follow-up workflows.

Result

The Student Admission Enquiry Form is designed to capture structured admission enquiries using all thirteen Basic Fields, apply appropriate validation, and store submissions in a report for review and follow-up. Once the form, report, and any optional confirmation-email workflow are configured and tested in Zoho Creator, the stated objective is achieved.
