RAJALAKSHMI ENGINEERING COLLEGE | DEPT. OF CSBS

Student Admission Enquiry Form

Experiment 09 & 07: Basic Fields Construction & CRM Integration

Student: Hoshni Sivaprakash
Register No: 241401029
Department: CSBS
Course: Low-Code Application Dev

1. Aim & Objective

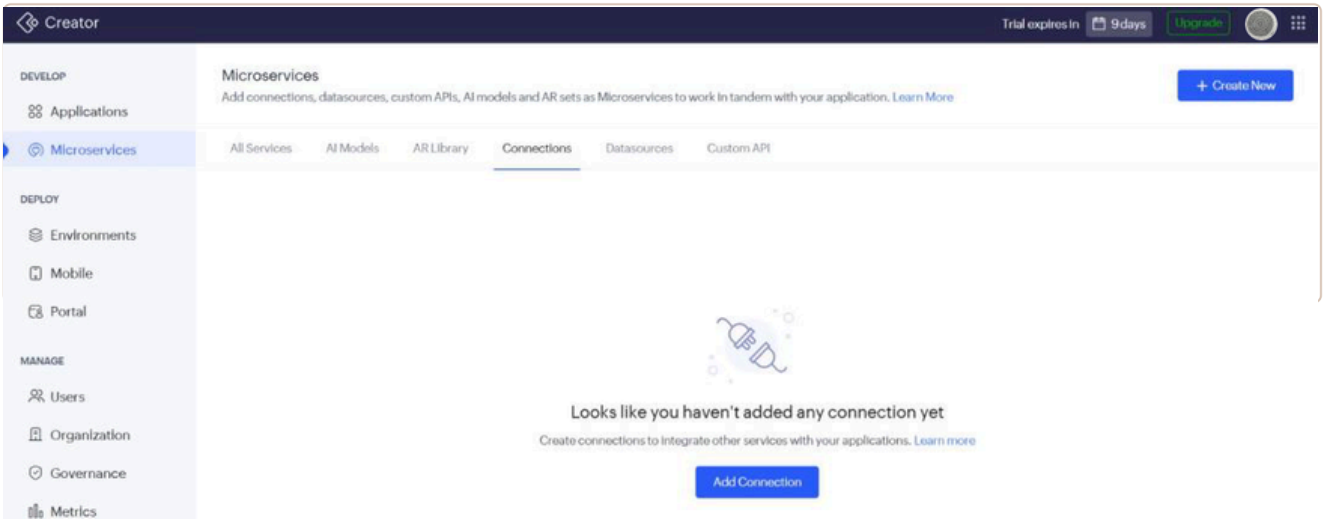

Todesign and construct a functional **Student Admission Enquiry Form** application in Zoho Creator utilizing all thirteen **Basic Field types** to capture structured prospective student data, and integrate the form with **Bigin by Zoho CRM** using microservice connections and Deluge scripting for automated lead creation.

2. Problem Statement

TheAdmissions Officereceives inquiries via calls, walk-ins, and emails, leading to fragmented records. This lab exercise centralizes enquiry capture into a unified, validated digital application that automatically syncs applicant records directly into Zoho CRM.

3. Basic Fields Mapping Specification

Basic Field	Form Field Name	Purpose & Functional Role	Sample Value
Name	Student_Name	Captures full name via First/Last subfields	Divya Ramesh
Email	Email_Address	Validated contact email for updates	divya@example.com
Address	Residential_Address	Full postal address (City, State, Pin)	12 Anna Nagar, Chennai
Phone	Contact_Number	Validated mobile number for callback	+91 98765 43210
Single Line	Guardian_Name	Parent/Guardian short name text	R. Ramesh
Multi Line	Additional_Remarks	Free-text course choice reasons	Interested in AI & DS
Number	Class_XII_Percentage	Numeric marks percentage (0–100)	92.5
Date	Date_Of_Birth	Date picker for applicant birth date	14-Mar-2008
Time	Preferred_Counselling_Time	Preferred time slot for callback	11:00 AM
Drop Down	Preferred_Course	Single-select list of UG/PG courses	B.Tech - AI & DS
Radio	Gender	Mandatory single selection radio option	Female
Multi Select	Areas_Of_Interest	Multiple interest selection area	Robotics, Coding
Checkbox	Terms_Agreement	Consent to terms and privacy policy	Checked (Agreed)

4. Form Layout Architecture

Section A: Personal Identity

- **Student Name:** First& Last subfields
- **Date of Birth:** Calendar date selector
- **Gender:** Radio button (Male/Female/Other)

Section B: Contact Details

- **EmailAddress:**Validated email format
- **Contact Number:** Phone number field
- **Residential Address:** Multi-line address block

Section C: Academic & Guardian

- **Guardian Name:**Parent/Guardianshort text
- **Class XII %:** Percentage mark input
- **Preferred Course:** Academic dropdown
- **Areas of Interest:** Multi-select options

Section D: Scheduling & Consent

- **CounsellingTime:**Preferred timepicker
- **Remarks:** Additional free-text comments
- **Terms Agreement:** Mandatory checkbox

5. Validation Rules & Data Constraints

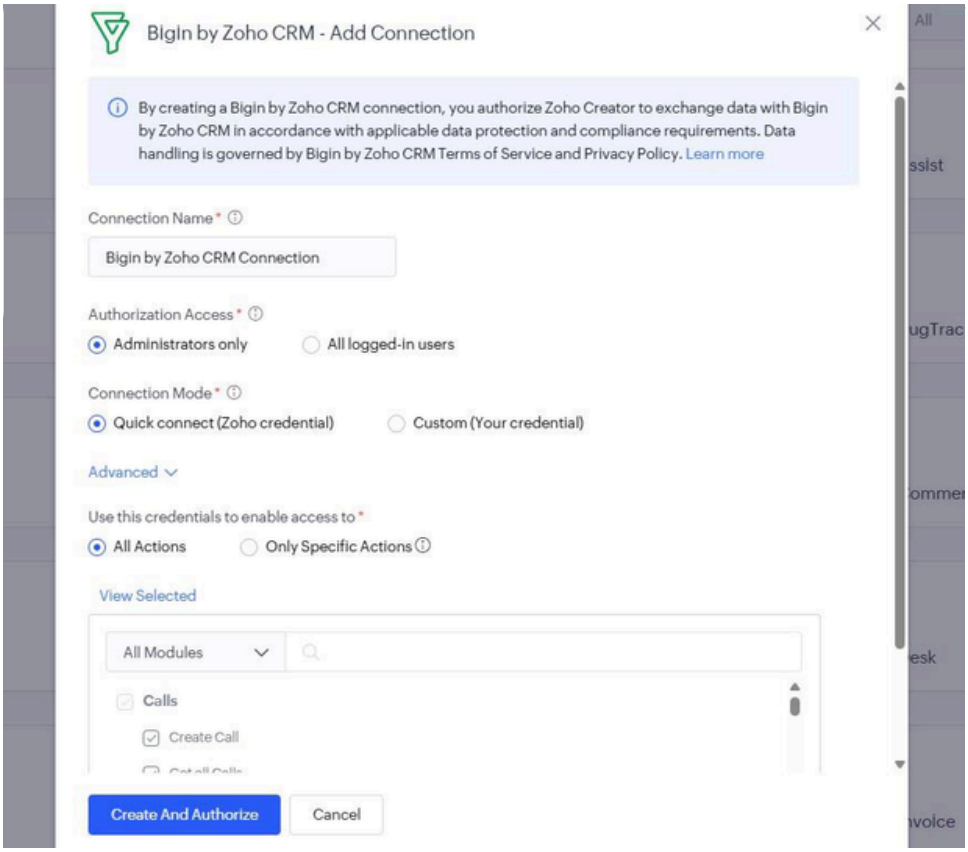

Toensurehigh dataintegrity, thefollowing business constraints were configured in Zoho Creator:

- **Mandatory Fields:** Name, Email, Phone, DOB, Gender, Course, and Terms Agreement must be populated prior to submission.
- **Email Validation:** Native email syntax check enabled to prevent invalid address formats.
- **Phone Formatting:** Indian mobile number pattern matching enabled (+91 validation).
- **Numerical Boundary:** Class_XII_Percentage restricted strictly between 0 and 100.
- **Date Constraint:** Date_Of_Birth disallows selection of future dates.

6. Microservices & Bigin CRM Connection Setup

PhaseA— Connection Creation: Navigate toCreator *Develop>Microservices > Connections*. Click **Add Connection** and choose **Bigin by Zoho CRM**. Configure settings as follows:

- **Connection Name:** Bigin by Zoho CRM Connection
- **Authorization Access:** Administrators only
- **Connection Mode:** Quick connect (Zoho credential)
- **Permissions:** Enable access to All Actions

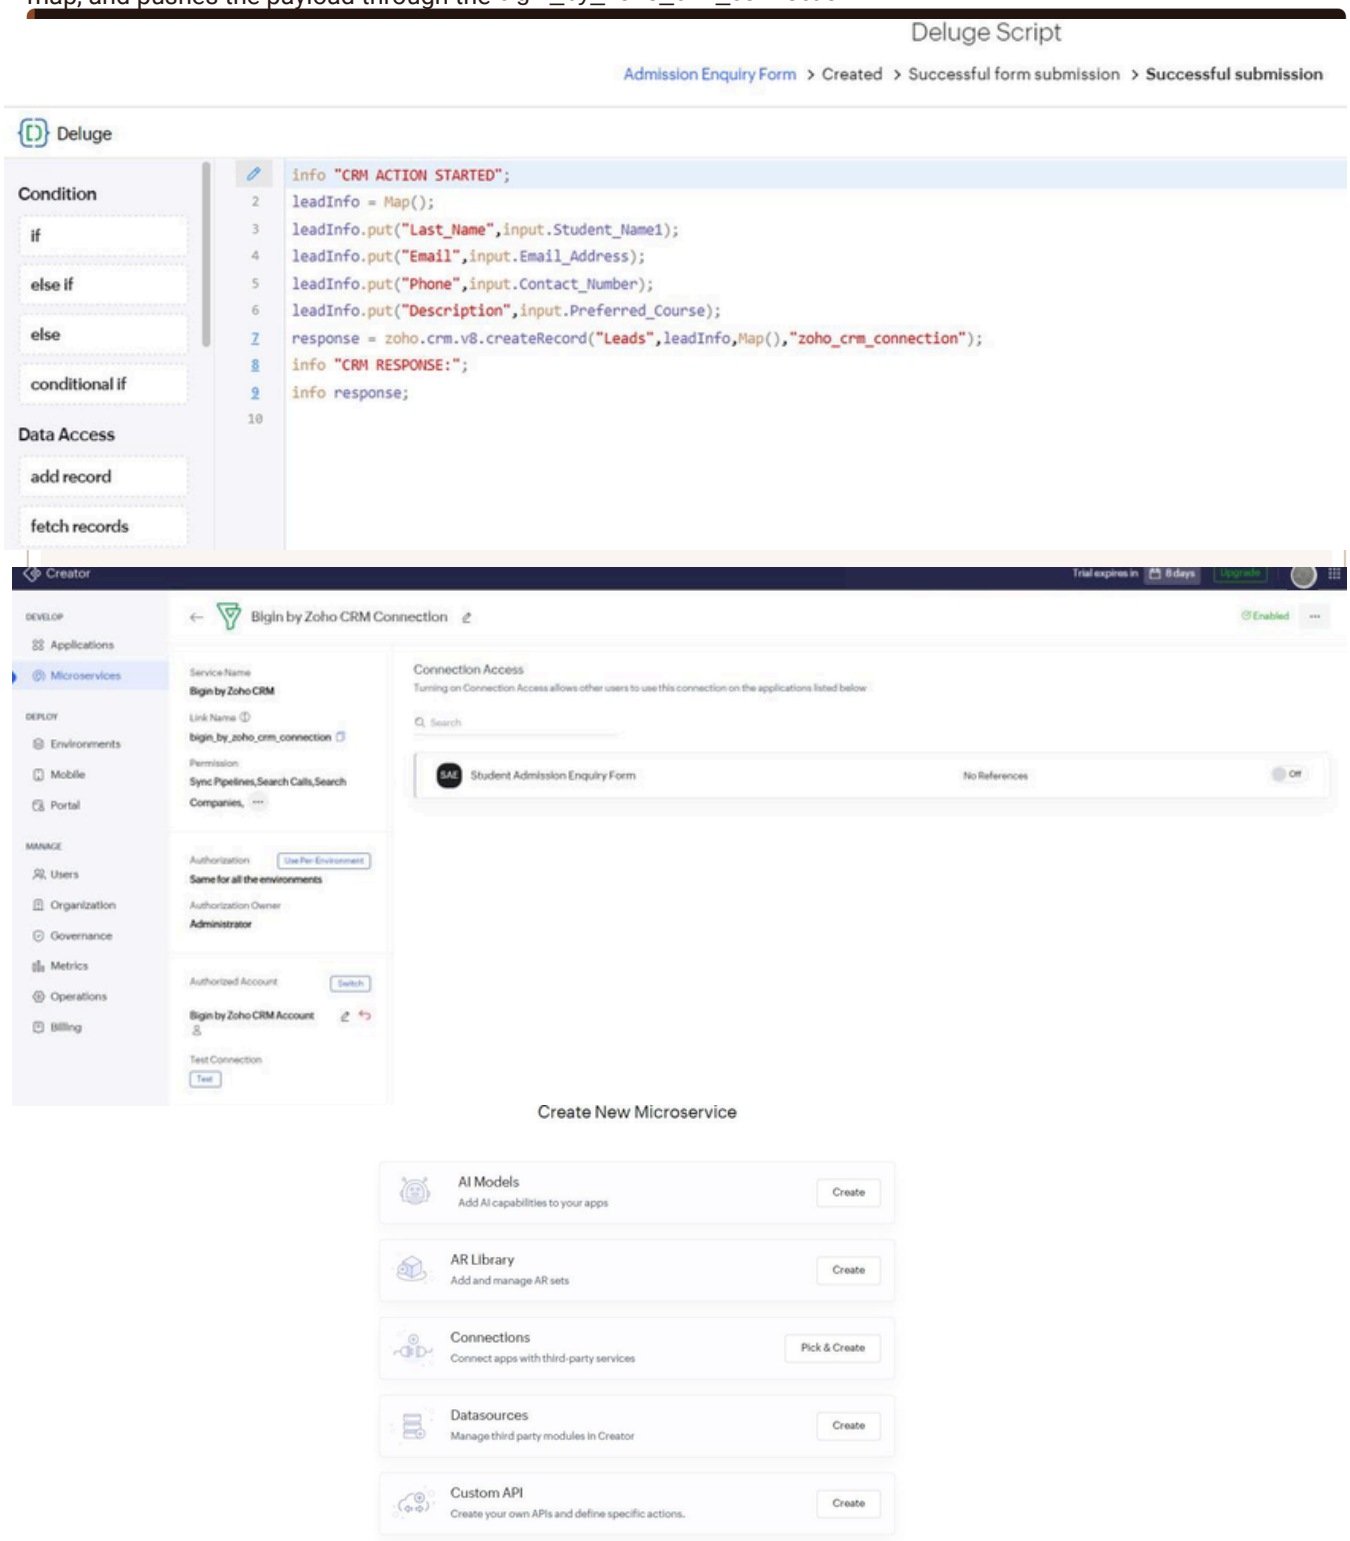

7. Form Workflow Automation Setup

PhaseC — WorkflowEventTrigger: Createanew form workflow on the Admission_Enquiry_Form configured to execute on Created > Successful form submission with condition Run this action: Always .

8. Deluge Script Implementation

Phase D — Deluge Integration Script: The script below extracts submitted enquiry values, constructs a CRM Lead map, and pushes the payload through the bigin_by_zoho_crm_connection link.

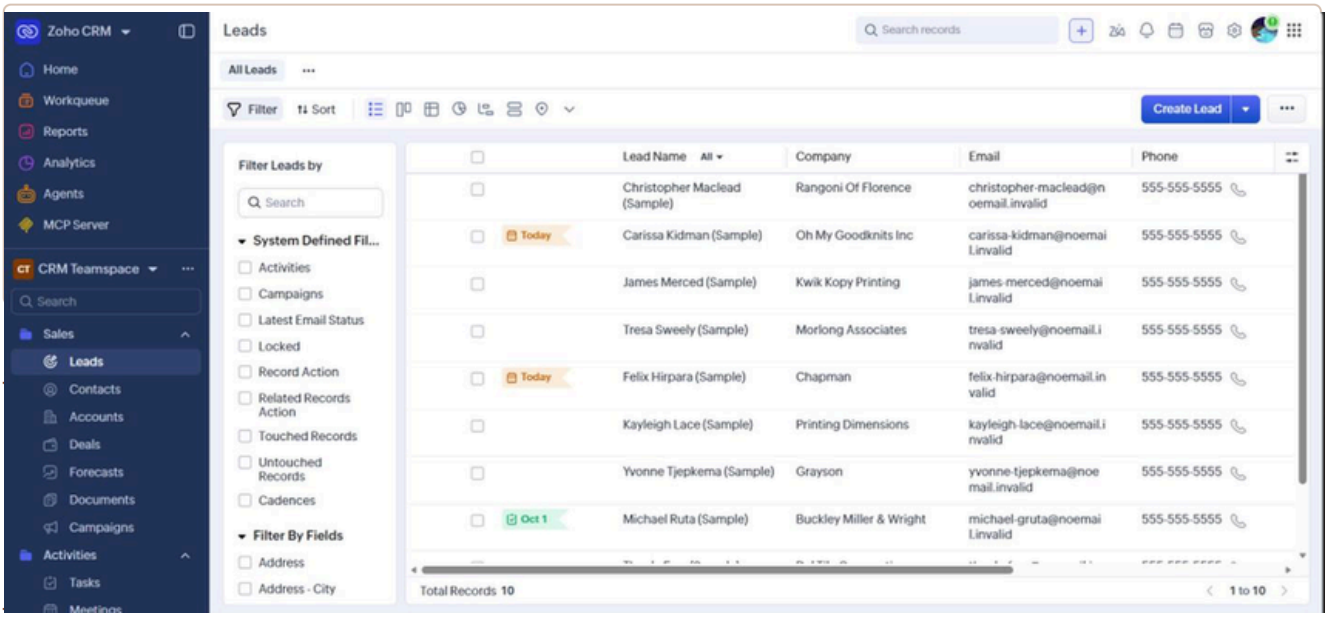

9. Script Compilation & Execution Trace

TheDeluge script compilessuccessfully via Creator's built-in syntax parser. During form submission, the script extracts the applicant's credentials, forms a JSON payload, and calls Zoho CRM API v8. The returned response contains the newly generated CRM Lead ID, confirming successful execution.

10. Output & System Verification

Theend-to-endintegrationbetween Zoho Creator and Bigin by Zoho CRM was verified through live form submissions. Submitted records were validated in both the internal report view and CRM Leads module.

Diagnostic Metric	Verified Operational Status
Microservice Connection Status	**Connected (Green Verified)**
Connection Link Name	bigin_by_zoho_crm_connection
Target Destination Module	Zoho CRM — Leads Module

11. Expected Learning Outcomes

Mastered the selection and mapping of all 13 Basic Field types in Zoho Creator.
Configured field-level business constraints (mandatory checks, regex formats, numeric ranges).
Configured Microservices connections to establish secure authentication with external CRM modules.
Wrote Deluge integration scripts to map low-code form inputs into CRM REST API payloads.

12. Conclusion & Evaluation

The**Student AdmissionEnquiryForm** application was successfully built and integrated with Zoho CRM. Enquiry submissions trigger seamless data transfer into Zoho CRM, proving the efficacy of low-code development for institutional automation.
